Introduction

- Introducing the Sneaker Hub App, built with cutting-edge technology and sleek design to revolutionize your footwear shopping experience. Whether you're a sneakerhead or simply seeking stylish kicks, our app is your ultimate destination. With an intuitive interface and state-of-the-art features, Sneaker Hub brings personalized recommendations and seamless navigation to your fingertips. From exclusive releases to classic favorites, explore a curated collection tailored to your taste. Get ready to step up your shoe game with the Sneaker Hub App.

Problem Statement

- In today's hectic world, sneaker enthusiasts struggle to stay on top of releases and manage their collections efficiently

- Existing apps lack personalization and responsiveness, leaving users frustrated.

- The Sneaker Hub App solves this by offering a tailored, intuitive platform for seamless sneaker shopping and staying updated on the latest releases.

Objectives of the project

- Provide users with the most up-to-date weather information, ensuring they receive timely updates on weather conditions.

- Design a user-friendly interface that is intuitive and engaging, encouraging regular use and making it easier for users to navigate through the app.

- Include a wide range of weather information such as temperature, humidity, wind speed, and precipitation, catering to the diverse needs of users.

Requirements of the system (Hardware)

Development Machine:

- **Processor: Intel Core i5 or better (or equivalent)**

- **RAM: 8 GB minimum, 16 GB recommended**

- **Storage: At least 10 GB of free space for the development environment, dependencies, and project files**

- **Internet Connection: A Stable Internet Connection**

User Devices:
- **Mobile Devices: Compatible with modern iOS and Android devices**
- **Screen Resolution: Supports various resolutions for compatibility across**
- **devices**

Requirements of the system (Software)

- **Development**
  - Environment: Flutter
  - SDK
  - Dart
  - Android Studio
  - IDE Android emulator Git

- **Firebase Console**

LITERATURE SURVEY

Sr No.	Title	Author	Publish Date	Discription
1	Online Footwear Sales: Drivers and Challenges With a Perspective of Emerging Markets	Mahima Shukla,Richa Misra	January, 2021	The purpose of the study is to investigate factors that determine consumers' online purchase intention of buying footwear. Footwear, being a high involvement product, is difficult to sell online as people try size to fit before buying, which is more than any other product category. As per the previous studies, the need for touch is the most prominent factor inhibiting customers to buy footwear online
2	An Empirical Study on User Purchase Intention on the Creative Product:	Chen Pang	September, 2008	A study of consumer acceptance of the Internet as a channel of purchasing creative products (e.g. apparel) was conducted using a modified technology acceptance. Two consumer characteristics (product involvement and product innovativeness) were introduced to develop an extended Concept

3	A Comparative Review of Footwear-Based Wearable Systems	NagarajHegde,MatthewBriesORCIDandEdward Sazonov	1 August, 2016	In today's era the internet and smartphone has changed the way of communication and doing the business. The rapid growth of online shopping facilitates new opportunities to do business.

Conclusion

- 1. Firebase Integration: The app leverages Firebase for user authentication, ensuring secure and reliable login functionality.

- 2. Provider State Management: With Provider, the app efficiently manages authentication state, offering a responsive user experience.

3. Material Design UI: Following Material Design principles, the app boasts a visually appealing interface with custom theming, providing users with an intuitive and cohesive experience while browsing sneakers.
